AIDEN MORI
Full Stack Developer

✉ aiden77mori@gmail.com   🌐 *https://aiden77mori.github.io/aiden-portfolio*

I am an experienced and detail-oriented **web and smart contract** developer with expertise in **leading teams** of front-end, back-end, and smart contract developers. I have developed various **DeFi**, **NFT marketplace**, and **web3 projects**, including **games** on **different blockchain networks** such as Ethereum, Polygon, and Binance Smart Chain. My extensive knowledge of **programming languages**, **frameworks**, and **database structures**, combined with exceptional analytical and time management skills, make me a **reliable team player capable of solving complex problems**. My passion for technology and willingness to stay up-to-date with the latest trends make me a valuable asset to any team.

Experience

Development Team Lead on The Blockchain Projects, KURONURI, Remote   *Dec 2021 - Present*

- As a blockchain and web developer, I've been **leading a development team** in creating new products that have brought value and benefits to users by **connecting the blockchain with real industry**. I am always eager to take on new challenges and to push the boundaries of what is possible in the blockchain and web development space. I am committed to delivering high-quality solutions that meet the needs of my clients and exceed their expectations.
- I prioritize open **communication, transparency, and mutual respect** in all of my interactions with colleagues and clients. I have **collaborated closely with over 5 developers** to create clean interfaces and simple, intuitive interactions that enhance the usability of our products.
- I am particularly proud of my work in building one **DeFi Ecosystem**, **Token Generation** and **Token IDO platforms**, **2 NFT marketplaces**, and over **20+ various Web3 projects**. I have also developed **5+ blockchain-based Play-to-Earn games** and created **Metaverse** platform that have captured the imagination of users.

Full Stack Developer, INCARTA (Part-Time), Australia   *July 2019 - Oct 2021*

- As a developer with experience in the Health and Life Sciences sector, I have had the opportunity to work with innovative companies like Incarta, which have a demonstrated history of innovation in hardware and software development.
- **Improved the patient monitoring and care** so that the heathcare providers can access real-time data on patients' physiological parameters and make informed decisions on the treatment option. One of the products I have worked on is their leading clinical records platform, **Alarta**, which is among the **most advanced cloud-based critical care medical record systems**.
- As part of my work with Incarta, I have focused on **improving the connectivity and integration** of Alarta with other healthcare technologies. By **integrating BioBeat with Incarta's HL7 platform**, we have been able to provide unprecedented connectivity between wearables and electronic medical records.
- The project that I'd worked here has been especially useful during the **COVID-19** pandemic, where virtual consultations and remote patient monitoring have become increasingly important. These technologies have the potential to revolutionize patient care and improve health outcomes, and I am proud to have been a part of their development.

Front End Developer, OpenAgent (Contract), Australia   *Nov 2017 - Apr 2019*

- As a developer on the team that built **Australia's #1 real estate agent comparison site**, I contributed to **simplify the home selling process**, which can be quite stressful for many people, which resulted in significant value-addition to our users in their home selling journey. Also through my working on **improving the website's user interface**, **optimizing its speed**, we were able to improve the website's speed by **35%**, resulting in a **20%** increase in user engagement.

- Working closely with the data science team, I developed algorithms that could **analyze user data and recommend the best possible matches** between users and agents. As a result, our platform was able to match over **80%** of our users with top-performing agents in their local area, resulting in a **25%** increase in customer satisfaction.
- Overall, my experience working on Australia's #1 real estate agent comparison site was incredibly rewarding, as it allowed me to use my skills to create a platform that provided a valuable service to the people of Australia. I am proud to have been a part of this project, and I look forward to applying the knowledge and experience I gained in my future career endeavors.

Software Engineer, Le Grand Co, Ltd (Internship), Japan   *Apr 2016 - Apr 2017*

- During my internship, one of the most exciting projects I worked on during my internship was **content marketing and SEO measures**. I collaborated with the content team to develop a comprehensive content marketing strategy that aimed to increase brand awareness and drive organic traffic to the company's website. By **utilizing SEO best practices and conducting keyword research**, we were able to increase website traffic by **40% within the first month of implementation**.
- Overall, my internship experience at Legrand was truly rewarding, as it provided me with hands-on experience in a variety of digital marketing and software engineering projects. I was able to work with a talented team of professionals who were passionate about their work and committed to delivering high-quality services to clients.
